

Lundia Storage Systems

The Lundia mobile storage system is an ideal solution for your storage requirements. This original Scandinavian system is prefabricated and includes fully adjustable wooden storage shelving.

It is attractive, saves valuable floor/office space and is incredibly easy to use.

A combination of the sizes below can be manufactured to achieve your optimal space solution.

Calculations of Height, Depth and Length

The dimensions of the Mobile shelving system can be calculated on the basis of the figures listed below.

Height: Frame height + 130 mm for mobile base/stationary base

Depth: Frame depth, back to back, + 4 mm clearance overall

Length: Length of shelving bay x number of bays + 60 mm for face panel and wall clearance.

Rota drive

Height: Frame height + 130 mm

Depth: Frame depth back to back + 4 mm

Length: Length of shelving bay x number of bays + 130 mm

Upright Heights mm	Shelf Lengths mm	Shelf Depths mm
1829	600	235
2100	800	292
2400	900	381
	1000	457
	1200	610

Mobile Shelving and Storage Accessories

To make your Lundia Mobile even more flexible, you can add the following features

- Hanging rails
- A4 paper storage
- Pullout work shelves
- Toaster racks to hold lateral files

The Space Savers

The Lundia Mobile Storage System comprises standard Lundia prefabricated and adjustable wood storage shelving erected on rail riding carriages, saving up to 50% of the floor space required for an equal amount of conventional shelving.

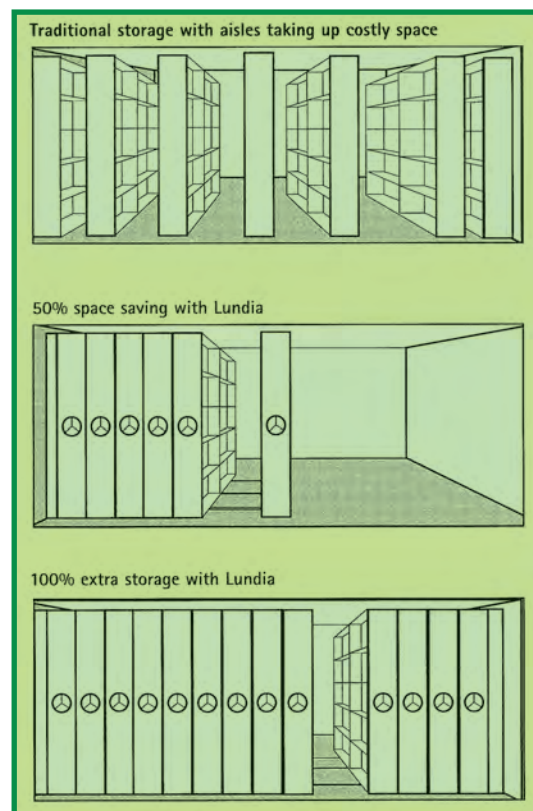

Moveable units of Lundia Mobile are easily and silently rolled by hand, left or right, to open one gangway between bays of shelving.

Spacetaking permanent gangways are eliminated and aisles between installations of shelving are shortened.

Floor space gained can be used for offices, work area or additional storage facilities.

Endless Benefits

- Save valuable floor space with Lundia's range of mobile shelving systems
- Blends with every décor and aesthetically pleasing
- User friendly with ease of adjustability with shelf pins, no nuts and bolts
- Lundia shelves are smooth and flat both sides with no downturn lips to obstruct items being removed
- Lundia mobile systems move silently, our timber construction absorbs noise and will not rattle
- Lundia mobiles have a tracking system under each up right for greater ease of movement
- Locking options available
- Raised flooring between tracks on request
- Lundia storage systems will not conduct heat, electricity or magnetic fields – all potentially hazardous to files and records
- Lundia storage systems are guaranteed for five years when installed by our expert team
- The texture of wood helps prevent items from “walking off” the shelves
- Wood absorbs atmospheric moisture, no condensation, no rust
- Shelves are adjustable at 50 mm or 25 mm centres optional
- All Lundia shelves products are easily installed, fully adjustable, demountable and relocatable.

Storage Systems

738 Manual Systems

The Lundia Mobile Storage System is an ideal solution for your storage requirements. It is attractive, saves valuable floor/ office space and is incredibly easy to use.

739 Rotadrive System

The Lundia Rotadrive is designed to make the most heavy and demanding storage requirements easy. It is a mechanically assisted system which enables the user to effortlessly move huge amounts of fully loaded shelves. Smooth, easy movement is a key feature of the Rotadrive System. One drive shaft connects the roller bearings located under each pair of upright frames. This ensures positive, accurate tractions of each mobile (no racking). Up to three fully loaded mobiles can be moved with one turn of the wheel from another.
